

## Countess Radiator 650mm

Countess Cast Iron Radiators are an exact authentic reproduction of the 1930s original. The Countess is a decorated version of the Duchess cast iron radiator allowing ornate cast iron radiators to be used in combination with solid fin cast iron radiators.

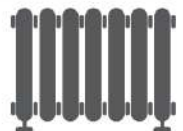

The Countess cast iron radiator is in between the two Dutchess cast iron radiators in height at 650mm and features elegant scrolling foliage across the shoulders of this casting and at the base.

Countess cast iron radiators were used in transatlantic liners as well as in the very best properties constructed in the 1930s.
